Campaign info

The Hands off China campaign is being set up in the light of the vitriolic and deceitful propaganda campaign being waged in the imperialist press against China, as well as the protracted campaign being waged by the US and its allies aimed at destabilising, weakening and encircling the country.

Ignorance and misinformation about China is widespread in Britain, even in the working-class movement; hence the need for an organisation which seeks to counter imperialist propaganda and set the record straight.

The aims of Hands off China are:

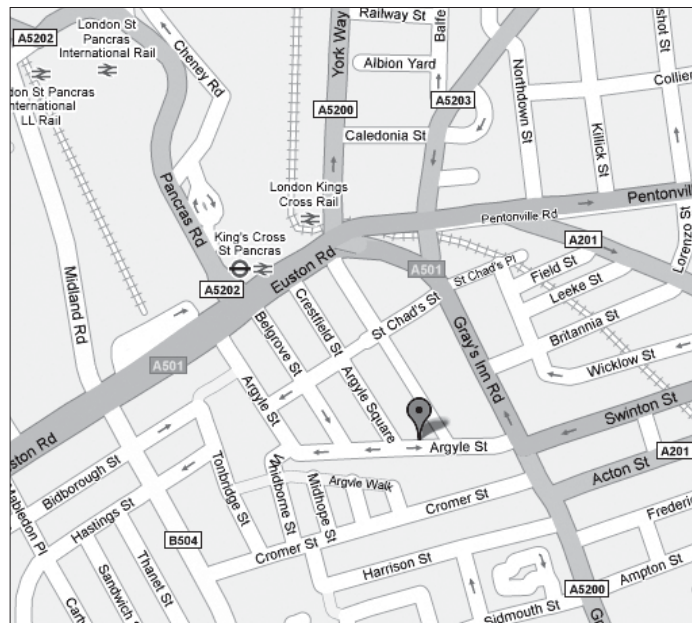

- To defend the sovereignty and territorial integrity of the People's Republic of China (PRC) against imperialism and its stooges;
- To support the 'One China' principle and the PRC's just stands on such issues of its vital national interest as Taiwan and Tibet
- To refute hostile propaganda and misinformation of the capitalist media and others against the PRC
- To uphold the great revolutionary traditions of the Chinese communists, working class and people
- To support the achievements of the Chinese people in eliminating poverty and building a strong, powerful and modernised socialist country; as well as the PRC's contributions to realising a multi-polar and peaceful world and to the independent, anti-imperialist development of the countries of Africa, Asia and Latin America
- To support Chinese workers, students and other members of the Chinese community in Britain in their struggles against racism and for their rights.

Please come to the launch meeting to find out more and to get involved.
